SUMMARY

I am currently a sophomore pursuing a major in Information Engineering and Media at Nanyang Technological University. I'm a hardworking student and love learning new things especially in the world of web-development.

EDUCATION

Nanyang Technological University <i>Bachelor of Information Engineering (GPA 4.71 / 5.00)</i>	Singapore 2022 – 2026
---	---------------------------------

Relevant Courseworks: Introduction to Computing (IE1005), Data Structures and Algorithm (IE2108), Object-Oriented Programming (IM1003), Designing and developing databases (BC2402)

ORGANIZATION

NTU Student's Union Information Technology Subcommittee	<i>Sept 2023</i>
--	------------------

Student Development Subcommittee Member	<i>Sept 2022</i>
--	------------------

PINTU Operations & Sports Subcommittee Member	<i>Sept 2022</i>
--	------------------

SKILLS

Language: JavaScript, Java, Python

Front End: React JS, Redux, Vue, Pinia, HTML & CSS

Back End: Node JS, Express, Sequelize, PostgreSQL

PROJECTS

IMDB clone	<i>August 2023</i>
-------------------	--------------------

- Created an immersive IMDB clone, coupled with an admin content management system.
- User client featured user registration, secure authentication, profile management, seamless browsing, watchlist creation and ability to watch movie trailers from youtube.
- Admin client facilitated content moderation, empowering administrators to manage movies and genres effectively.
- Tech stack: React JS, Redux, express, MongoDB

Shoppable	<i>July 2023</i>
------------------	------------------

- Designed and constructed a dynamic fake e-commerce platform, offering users an intuitive shopping experience.
- Incorporated essential features including user authentication, a comprehensive product catalog, a streamlined shopping cart, and efficient order management.
- Integrated Google Maps for address selection and Geolocation for quick checkout
- Implement payment gateway using Midtrans API
- *Tech stack: Vue, pinia, express, PostgreSQL, sequelize*

Sudoku	<i>April 2023</i>
---------------	-------------------

- Collaborated on a Java-based pair project as part of the IM1003 coursework, which focused on object-oriented programming.

AWARDS

Waterloo CSMC (Canada Senior Mathematics Competition)	<i>2021</i>
--	-------------

- Won distinction award for scoring the top 25 percentile of contestants.
